Career Objective

Experienced software developer with a proven track record of success in the IT and services industry.

Expertise in the complete software development lifecycle, from requirements analysis and use case definition to implementation and deployment. Proficient in developing interactive and reliable web-based systems, mobile backends, and web services for mobile apps and frontend systems.

I am seeking a position with a progressive software development company that offers challenging, rewarding work and the opportunity to expand my knowledge and abilities in creating client-centric solutions.

Technical Skills

Backend: PHP, Symfony 5/6, Laravel, Doctrine, MySQL, C#, ASP.NET Core MVC, Microservices, OAuth2, JWT, APIs, Docker.
Frontend: HTML, CSS, JavaScript, jQuery, AJAX, Twig, React Native with Expo, VueJS, InertiaJS.
Others: Cloud, Node.js, ExpressJS, PHP CSFixer, PHPStan, CICD, RabbitMQ, Xdebug, Linux, K8, Git, PostgreSQL, WordPress.

Work Experience

Symfony App Developer at Confidential, Doha, QATAR   April 2020 – Present

Currently, I am a Symfony App Developer with experience in developing SaaS product that offer a variety of services, including fitness, food and beverage, and retail. I have developed the internal back-office system, including the user interface, database, and business logic. I have also integrated the REST APIs with vendors and third-party systems, and developed custom APIs for our frontend system, a React Native mobile app, to create a user-friendly frontend.

Technologies: PHP, Symfony 5/6, React Native & Expo, Git, MySQL, REST APIs, GCP.
- Migrated the old back-office system to Symfony 6, adding new features and improving performance.
- Implemented an RBAC system to restrict access to the back-office application.
- We upgraded the old mobile app to the latest version of React Native, fixing bugs and improving the user experience.
- Developed a point-of-sale (POS) system for our SaaS platform that is easy to use.
- Integrated a third-party video call service with our app, developing APIs to connect it with the frontend. This feature helped our clients stay connected during the COVID-19 pandemic.

Backend Developer at Alkunat, Doha, QATAR   August 2018 – March 2020

I joined **Alkunat** as Backend Developer where I have worked on the StarsLeague mobile Football Fantasy Game which is a real-time Mobile Application. Here I have also been working on other client projects as well where my responsibility was the design and development of backend systems, API specifications and development & documentation.

Technologies: PHP (Laravel, CodeIgniter & Custom), AWS, Azure, PostgreSQL, Microservices, RabbitMQ, REST APIs, Git, JIRA.

- Handling end to end feature development from requirements gathering to production.
- Collaborated with DevOps guy in designing & development of the scalable Backend Architecture to handle large user requests during peak time (match duration).
- Drove the development of SL's new backend to fulfill the requirements of new UI and development of REST APIs & business features from requirement analysis to the production stage.
- Supported the existing system and improved where required.

Laravel Web Developer at HRT(High Rank Technologies Private Limited), Islamabad   **February 2018 – July 2018**

Laravel Web Developer at ikonami, Islamabad   **September 2017 – Feb 2018**

Software Developer at TechArete, Islamabad   **March 2015 – March 2017**

Key Competencies & Personal Skills

- Skilled working in a Micro-Service architecture, API development & building scalable and reliable platforms.
- Experience designing and implementing modern messaging platforms (e.g., RabbitMQ, Azure Storage Queue).
- Enthusiastic and ready to learn new tools and technologies in short time.
- DevOps Mindset (Cloud, Jenkins (CI/CD), Git, Docker, Kubernetes).
- Experienced in integrating third-party APIs into web applications.

Academic Qualifications

MCS (Masters in Computer Science)	**2012-2014**	B.Sc. (Bachelor of Science)	**2009-2011**
Department of Computer Science Quaid-i-Azam University		University of the Punjab	

Courses / Certificates & Diplomas

Microservices – Fundamentals from IBM	SQL for Data Science
Symfony 4 Level 1	Implement a Relational Database with SQL
Full Stack Web Development with React	Certified Web Application Developer (PHP/MySQL) *From: EVS (eVentureSolutions)*
